MENTORA'S ERP PERFORMANCE TESTING SHOWCASED AT HP UNIVERSE '09
Dan Downing to present on "Load Testing Oracle R12 Sales & Service"

ATLANTA, GA (May 18, 2009) - Mentora Group, Inc., a boutique provider of ERP performance testing and managed hosting for revenue-driving applications, announced today that Dan Downing's presentation "Load Testing Oracle R12 Sales & Service" has been selected by HP for presentation at the annual HP Software Universe conference in Las Vegas.

"This opportunity reflects both the importance of eliminating the 'invisible risk' of system performance from ERP implementations and the depth of real-life experience in Oracle and SAP testing that we can share," said Dan Downing, VP of Testing at Mentora, "It is a special opportunity for us, as a services company, to be selected to present an instructional track session"

Dan's presentation will provide detailed tips and techniques for using HP LoadRunner to load test the Sales and Service modules of Oracle R12, Oracle's latest release of the Oracle eBusiness Suite software, also known as Oracle Applications. Using an actual eBusiness migration performed for a Fortune 50 company division with nearly 20,000 users, he will cover how to effectively model the workload, establish target load scenarios, monitor server infrastructure, and interpret results in business-actionable terms.

HP Software Universe, www.hpsoftwareuniverse2009.com, is the annual conference for users of HP Business Technology Optimization software, focused on practical, real-world things IT organizations can do to help their business stay healthy today and lead their market tomorrow. HP Software Universe 2009 will be held June 16-18, 2009 at The Venetian/Palazzo in Las Vegas.

ABOUT Mentora Group, INC. mentora.com

Mentora is expert in two areas: performance testing of enterprise systems and managed hosting for revenue-generating applications. Our customers choose Mentora for performance testing because we don't just test the system, we help fix it. We specialize in performance testing of Oracle eBusiness, eCommerce and Enterprise Web applications and of Websphere MQ and Citrix technologies. Our customers choose Mentora for managed hosting because we become integral members of their IT team. We host and manage business-critical applications in eCommerce, Healthcare, Insurance, Finance, and Publishing at top-tier AT&T data centers. We have offices in Atlanta, Boston, Washington DC and Dallas, and deliver services nationwide.

ABOUT HP Software <http://welcome.hp.com/country/us/en/prodserv/software.html>

HP Business Technology Optimization Software is designed to optimize the business outcome of IT. Business technology optimization (BTO) helps make sure that every dollar invested in IT, every resource allocated and every application in development or production meets business goals.
